

Schüco AutomotiveFinish

Brilliant metallic design for PVC-U windows and doors

Attractive design options with brilliant metallic colours

Creative freedom in external and internal design with Schüco AutomotiveFinish.

Schüco AutomotiveFinish allows new design effects to be combined with easily accessible, attractively priced services.

A completely new colour-coating process for PVC-U profiles is the result of three years collaborative development work between Schüco and a leading manufacturer of automobile paint. This has produced brilliant metallic shades and an environmentally-friendly, resource-conserving manufacturing process that was sponsored by the Deutsche Bundesstiftung Umwelt (German Federal Environmental Foundation).

Metallic-look on PVC-U – the combination of a brilliant surface finish with the fabrication benefits of PVC-U. Schüco AutomotiveFinish opens up new, top-quality design opportunities, both inside and outside. The high-quality coating provides outstanding colourfastness and weather resistance, which fulfils high technical requirements. Its special feature is that windows, doors and accessories can be designed tone-on-tone. The range includes 9 colours for use inside and outside, with different degrees of gloss and textures. In addition, the interior design collection offers 2 colour shades specifically for interior room design.
